PROFESSIONAL SUMMARY

- Proficient in web application design as a senior software engineer across diverse domains such as **E-Commerce** and **Distributed** Applications.

- I am skilled in creating **Single-Page Applications** and **Progressive Web Apps** using React, React-Router, and React-Redux right from the beginning.

- I possess significant expertise in using version control tools like **GIT**.

- Consistently developed optimized and user-friendly web pages that offer excellent performance and a rich user experience using a range of technologies, including **React, Typescript, NextJs, Javascript, Vue, and NuxtJs.**

- Employed **Docker** for CI / CD, and utilized **Pivotal Tracker and Trello** as tools for tracking.

- I have gained sufficient experience in **Agile** methodology, including **Scrum** and **Kanban**, while working as a Frontend developer in an Agile team.

- I have tested all web applications using **Jest** and **Cypress**, which has given me ample experience in creating exceptional testing scenarios.

- I have utilized **Docker** to swiftly build and deploy applications, with a particular emphasis on my proficiency in using **Dockerhub**.

- I possess ample experience working with **CSS**, **SCSS**, **Bootstrap**, and **Ant design**.

- I have created a visually appealing and well-organized user interface utilizing **Tailwind CSS** and **React Styled-Component**.

- I have independently completed several small projects using the **MERN** and **MEVN** stacks.

- I have extensive expertise in backend technologies such as **Node.js, GraphQL, Redis, Express.js, and Java.**

- I have utilized **Restful API** for integrating **APIs**.

- To summarize, my most robust skills are in **Javascript/Typescript, React/NextJs, Vue, Node.js, Restful API/GraphQL, and CI/CD using Docker**.

TECHNICAL SKILLS

Languages
JavaScript, Typescript, HTML, CSS, SQL, PHP, Java

Frontend
React, Ant Design, Redux, NextJs, Vue, NuxtJs

Style
CSS, SCSS, Tailwind CSS, Bootstrap

Backend/API
Express.js, Node.js, GraphQL CI, Restful API, Redis, MongoDB

Version Controls
GIT - Github, Gitlab

Agile Methodology
Scrum, Kanban

Tracking Tool
Trello, Pivotal Tracker

Software platform
Docker

Testing
Jest, Cypress

EDUCATION

Advanced Level High School Diploma (Software Programming and Embedded Systems). Rwanda Coding Academy (Kigali, Rwanda) August 2022

PROFESSIONAL SKILLS DEMONSTRATED

Software Engineer at Open Rwanda Coding Academy.   **2020 - Now**

[Open RCA] club that brings developers together to execute solutions for global clients, worked with 30+ teammates, and used tools like GitHub to manage projects
ReactJS - NextJS - CI/CD- Docker - Tailwind - NodeJS - PostCSS - TypeScript - REST- ExpressJS - Redux
- Designed new features, data-flow diagrams, flow charts, and other diagrams and designs using UML
- Supported and led my colleagues to finish their tasks

Teacher Assistant at Future Skills Boot camp.   **Sept 2019- Oct 2019**

I have trained, coached, and supervised new staff members, including young Rwandans in high school. I shared my knowledge with them and together we learned new things. As part of a strong team, we made a significant impact on the young people we trained, increasing the interest of children in coding.

ReactJS - Vue - Bootstrap - JQuery - NodeJS - REST - MySQL - HTML/CSS - Team Working

- Received certificate showing my contribution as the best mentor of Software Development
- Built modern applications using SQL, REST Redis, JavaScript, MongoDB, and NodeJS

RELEVANT PROJECTS

Live JIT:
This is live streaming platform that offers a unique and engaging experience for both viewers and streamers. It is beyond that with the addition of creative, music, and talk show content, making it a versatile platform for all kinds of live streaming. The live project is still under development.
Technology Used: *NuxtJs, Typescript, NodeJs, Redis, Tailwind, HTML5 Video Player*

Advertising Application: **https://web-demo-ckqcg21qv-honorine22.vercel.app/**
It offers a high-quality website demo that can help businesses establish a strong online presence, attract more customers, and streamline their operations for greater efficiency and profitability.
Technology Used: *NextJs, Typescript, Tailwind*

Perusal: **https://persual.netlify.app/**
This is a demo of research platform designed to assist university students with their research work. It provides access to a wealth of existing research ideas, allowing students to build upon these concepts and generate new, creative ideas. Additionally, the platform checks for plagiarism before students can upload their research, ensuring that all work is original and free from academic misconduct.
Technology Used: *Angular, Typescript, Boostrap, NodeJs*
